This map is for basic information only and the Club recommend that you always use it in conjunction with an Ordnance Survey map (Landranger 194), or the club's interactive map available on the website to navigate your way around the fishery.

DORCHESTER FISHING CLUB

RIVER CERNE

TO GODMANSTONE
AND CERNE ABBAS

DIRECTIONS FROM DORCHESTER

Follow the A37 heading towards Yeovil. Turn right onto the A352 and through Charminster. Once through Charminster, follow the road for 3/4 mile, you will pass the right turn to Charlton Down. Travel another 1/2 mile and the road will straighten. Half way along this straight there is a small car park on the left marked Haydon Hill Car Park, opposite this is our access gate.

We have permission from the Dorset Wildlife Trust to park a single car in the car park. Please take care when crossing the road, our access gate has a combination lock, the code is '1066'. Dial in this number, releasing the shackle by pressing the button on the bottom of the lock. Please remember to jumble the numbers when re-locking the gate.

You are now approximately two thirds of the way up the beat. The bottom boundary is the fence line at the bottom of this field (as far as you can walk down) as is the top boundary (both marked).

FISHING

This is a small stream and fishing can be at times 'jungle warfare' & best done whilst wading, especially upstream of the parking place. There are plenty of access points all along the beat and more than enough room for two anglers.

The River Cerne is reserved solely for Members and their accompanied guests. Please ALWAYS keep to the edges when walking to and from the river.

NOTE

This map is for basic information only and the Club recommend that you always use it in conjunction with an Ordnance Survey map (Landranger 194), or the club's interactive map available on the website to navigate your way around the fishery.
